INNOVATIVE DESIGN TO SAVE TIME AND MONEY

For years, digital multifunction printer/copiers have added more features and functions.

But functionality can lead to over-complexity. That's why Sharp created the **HYBRID DESIGN**

of the MX-B401, integrating strategies to help **SIMPLIFY OPERATION, REDUCE COSTS**

and **PROTECT THE ENVIRONMENT**. The new Sharp MX-B401 MFP model is designed to

**USER-FRIENDLY, ECO-FRIENDLY OPERATION
TO HELP SPEED WORK, PROLONG LIFE AND REDUCE COST**

The Sharp MX-B401 is designed to minimize service requirements and maximize uptime. This model employs long-life, quick-replace cartridges to help extend supplies replenishment intervals and dramatically reduce downtime. Maintenance is trouble-free, with clean and simple replacement of supplies and machine maintenance procedures that can be performed quickly and easily by service technicians or help desk professionals.

- By utilizing a long-life **tri-component supplies** system consisting of individual toner, developer and drum cartridge, the working life of developer and drums is significantly prolonged—and consumables yield can be up to **six times higher** than that of typical mono-unit consumable systems.
- Sharp encourages customers to make use of the **Toner Recycling Program** that provides a pre-paid shipping label for returning used Sharp toner cartridges to our recycling facility. Learn more at: www.sharppusa.com/recycle.
- Supplies can be replenished with **no mess and no tools required**. Maintenance parts such as primary transfer belt, transfer roller, fuser, paper feed rollers and document feed rollers are also designed for quick, tool-free replacement.
- Power consumption on the MX-B401 is among the lowest in its class. This model complies with the Energy Star™ Program and the RoHS program to minimize energy consumption and the use of chemicals and materials that can harm the environment.
- Built on a sophisticated and **rugged unibody frame**, the MX-B401 is constructed to absorb vibration, reduce operating noise, and consistently produce superior image quality.
- Sharp's **second-generation micro-fine toner technology** and new developer combine to reduce graininess, produce clear reproduction of fine lines and halftones, and offer a lower consumption rate than conventional toner. The result is breathtaking image quality, less packaging materials and longer replacement intervals.

- Environmental leadership is a long tradition at Sharp. In 2007, we received the **Green Contractor Award** and the **Evergreen Award** from the U.S. government in recognition of our overall commitment to environmentally-friendly products, services, manufacturing procedures and for our recycling and waste reduction practices. For more information, please visit www.sharppusa.com/environment.
- In replenishing supplies, **downtime is virtually eliminated** to lower operating costs for end-users—and waste is reduced because the drums and developers are **used to their maximum life**.

PROVEN PROTECTION FOR CONFIDENTIAL DATA, DEVICE ACCESS AND NETWORK SAFEGUARDS

The exchange of digital documents in the 21st century creates new challenges for network security. Sharp has developed an award-winning, multi-layered security system to help protect valuable

Authority Group and Access Control

Advanced account management enables administrators to set authority groups for access to features of the MX-B401. Administrators can control which department, for instance, has full access to copying, printing, scanning and/or fax. Walk up users enter a code, Local Name and Password, or LDAP User Authentication to access the features assigned to their group. Users can also login utilizing a human interface device (HID) such as a Smartcard or Common Access Card (CAC).*

Documents Remain Confidential

To help protect your printed documents from unauthorized viewing, the MX-B401 offers encrypted PDF files for printing and scanning as well as **Confidential Printing** that requires users to enter a PIN code in order to print a queued document. Additionally, **Secure Fax Release** ensures received fax documents are held in memory until an authorized user enters a PIN code. So compliance with healthcare regulations such as HIPAA is easier.

networks

information and maintain employee confidentiality. No company has more experience in maintaining digital security—so corporate end-users and IT professionals can count on the proven safeguards of the MX-B401.

Data Erase and Encryption**

To help protect your data, the MX-B401 offers an optional data security kit that encrypts document data using **AES** (Advanced Encryption Standard) **encryption**. Additionally, the data security kit erases the temporary memory on the hard drive by overwriting the encrypted data up to seven times, offering an unprecedented level of assurance.

Tracking and Auditing Information

Legislation and industry policies require companies to be more aware of information flow from their offices. Sharp offers both built-in and additional hardware/software which allows users to control, access and track usage of each device on the network.

Control Device Access Over the Network

To help restrict access to the device over the network, the MX-B401 offers IPsec, SMB and extended support for **SSL Encryption** (Secure Sockets Layer), **IP/MAC address filtering**, IEEE 802.1x authentication, protocol enable/disable and port management for maximum security.

Network Scanning Access

To help protect your network from unauthorized e-mail communications, the MX-B401 supports **User Authentication**, requiring users to login before performing any network scanning operations.

DATA SECURITY

These scalable security offerings aim to protect your intellectual property, preserve confidential information and help your business to meet regulatory requirements, such as the Health Insurance Portability and Accountability Act (HIPAA), and the Gramm-Leach-Bliley Act (GLB).
